

Escalation Procedures & Process Mapping of New and Existing Data Issues

Presenter – Dave Andersen

May 9, 2007

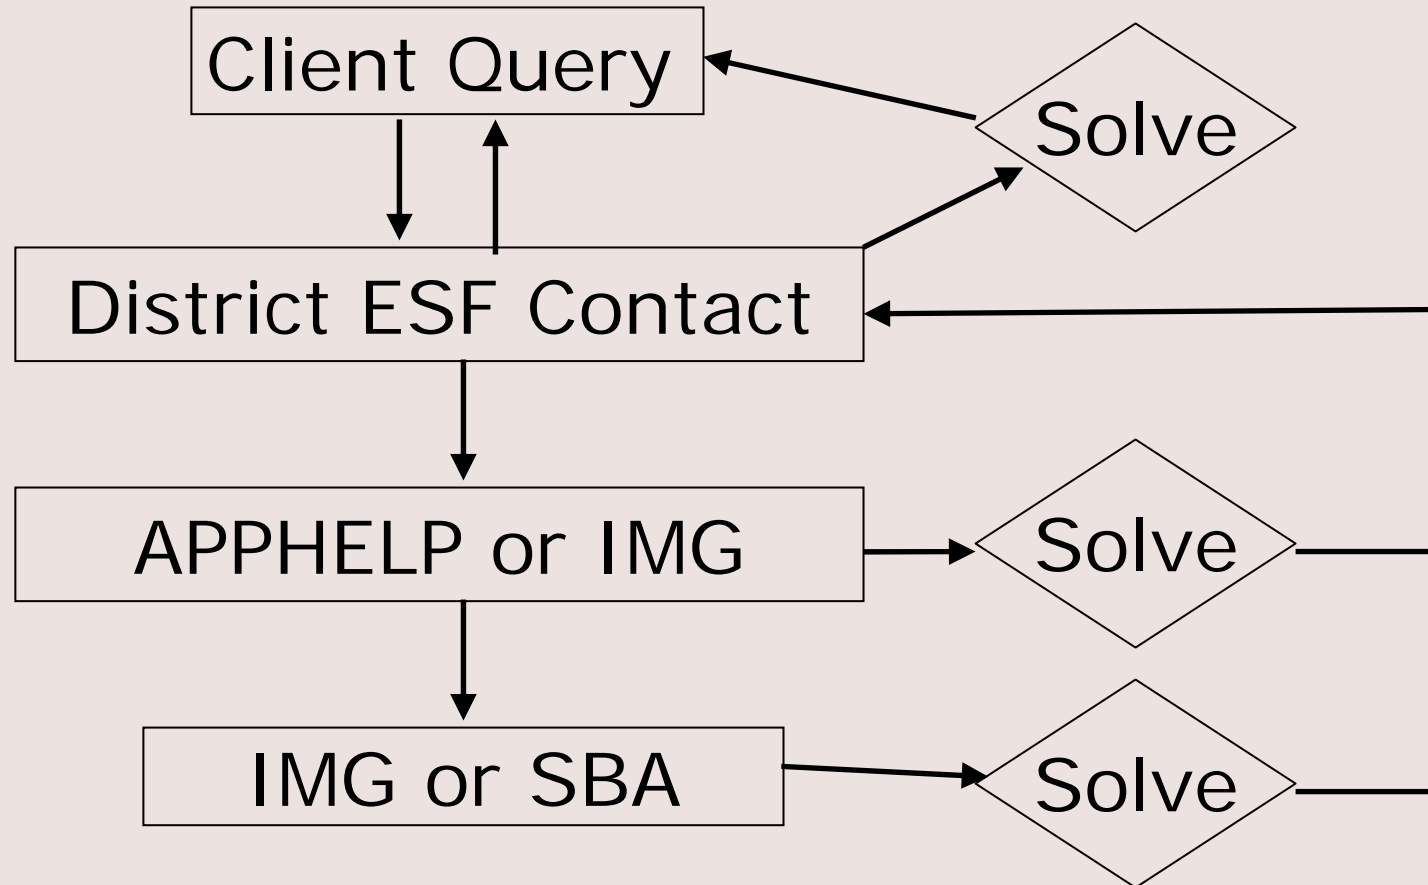

Escalation Procedures for Existing Data Issues

Purpose: to identify a single
point of contact to resolve
Electronic Submission
Framework data issues

Potential Data Issues

- Missing Data
- Redundant Data
- Obsolete Data
- Non Standard Data

Escalation Process Flow

Under Development

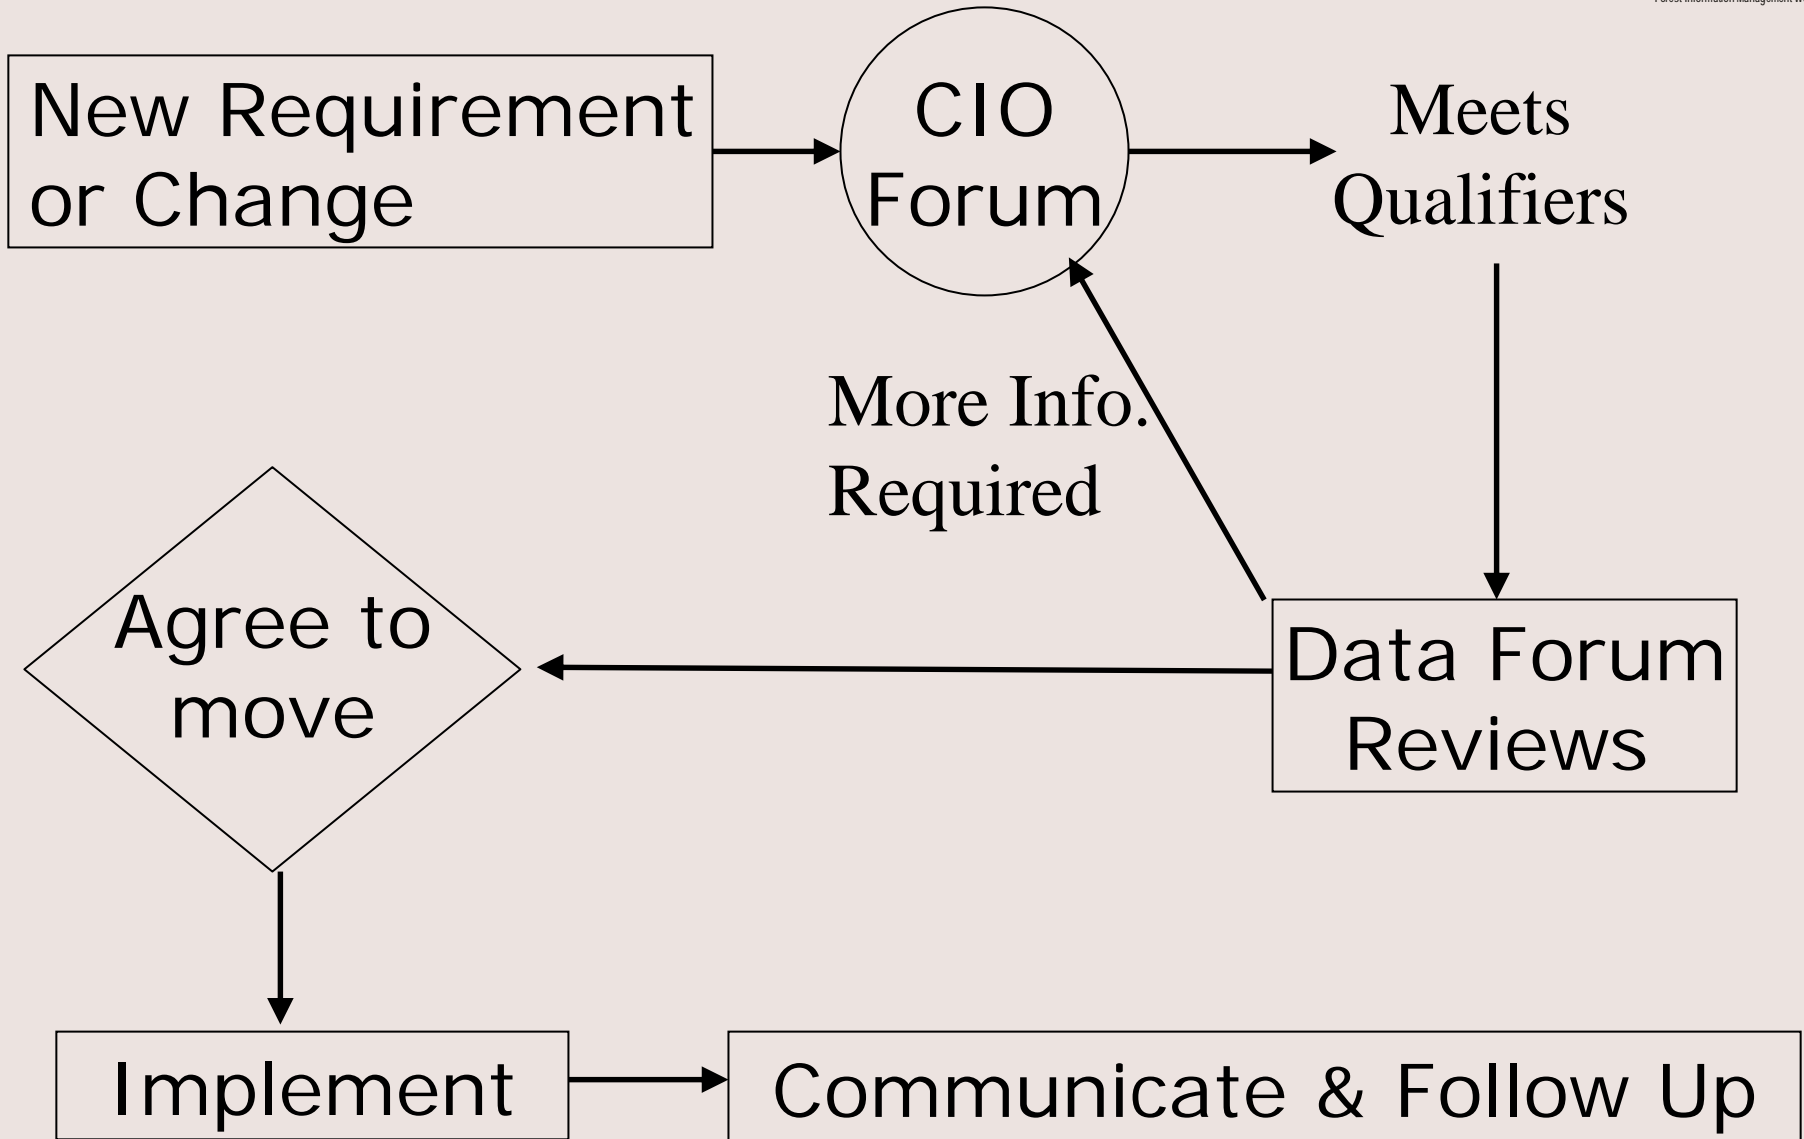

Process Map for New ESF Data Requirements

Purpose: to identify a procedure that will be used to implement new or major change to ESF data requirements

Change Qualifiers

- Is this a change / new system a requirement of legislation?
- Is this a streamlining enhancement to ESF?
- Does this fix an issue or a bug in ESF?

Process Flow

Data Forum

- Industry and Government Data Managers (1 from CIO Forum)
- 2 –3 ESF Coordinators
- 2 –3 Industry GIS Staff
- 1 Operations Manager (from Forest District Office)
